Professional Summary

I am seeking customer-facing product design roles in emerging tech within high-performance product teams. I thrive in environments where design is a strategic priority, not an afterthought. I value respectful, intelligent colleagues who raise the bar for everyone around them. Ultimately, I am looking for a mission-driven team excited to pour high energy and significant hours into achieving a goal greater than ourselves.

Experience

Onlook (YC W25) | Product Designer, Angel Investor

July 2025 - September 2025 San Francisco, CA

- Led comprehensive growth design effort for an AI design tool startup. Researched, prototyped, and developed a new-user onboarding flow and streamlined domain-hosting and project sharing experience, targeting key conversion barriers identified through session analytics – expected to drive improvements in user retention and paid conversion.
- Spearheaded the end-to-end research, design, and prototyping of an AI Chat feature, enabling users to seamlessly integrate project context into prompts via a context menu – maintaining the designers flow and increasing the efficacy of AI agent responses.

Slalom | Management Consultant, Products & Innovation

September 2020 - July 2025 San Francisco, CA Seattle, WA

- Redesigned the user experience of core product features, implemented core features in their content management system (CMS), and implemented a new brand design system for the leading brand of a Fortune 500 retailer—optimizing user experience and accelerating business results, reducing the time for front-end UI changes by 300% and dedicated front-end development headcount by 30%.
- Drove product design and strategy-planning efforts for The Gates Foundation’s grant and contract management payment and agreement processing product handling \$9B in transactions annually.
- Designed and developed product performance data visualization dashboards in Tableau for the C-suite of a \$100B+ multinational video game company reducing time to insights by 50% and increasing data accuracy used for decision making.
- Created a service design blueprint for a \$60B cloud business. Documented current state sales and renewal processes, identified areas for improvements in efficiency between sales, product, and customer teams, and delivered recommendations for revenue-driving process improvements.

Tableau Software (Acquired by Salesforce Inc. in 2019) | Analyst Intern

September 2020 - July 2025 San Francisco, CA Seattle, WA

- Designed and developed BI dashboards that identified at-risk accounts 10x faster and with greater accuracy, empowering Customer Success Managers to reduce churn through data-driven strategies.

Education

University of California, Berkeley

Expected Graduation: December 2026

MS Design Candidate, GPA 3.8

MDes Distinguished Scholar Award, MDes Student Officer (elected position), Collider Cup Pitch Finalist

Gonzaga University

2016-2020

BBA in Applied Analytics & Marketing, Cum Laude
